### An update on our reed switch supplier, OKI amidst the devastation in Japan

Dear business partner,

We are in constant contact with OKI. OKI management has confirmed to us that neither the plant and equipment nor the staff is affected by the horrible earthquake. Following a few energy shortages on Friday, production lines were all up and running again as early as Saturday afternoon. While the production facility has had no immediate impact we do however anticipate possible delays caused by logistic problems, given the current difficult situation in Japan.

We will keep you updated as any new developments arise.

Bernhard Meder

-CEO worldwide operations-

#### Corporate Profile MEDER electronic - "Products for tomorrow..."

MEDER electronic specializes in the manufacture and sales of Reed Switches, Reed Sensors and Reed Relays. Founded in 1981, the company is headquartered in Singen, Germany.
